L.A. COUNTY CASES	DAY PRIOR	CURRENT #	CHANGE/DELTA	LAST UPDATED
L.A. County	73,791	75,084	+1,293 (+1.72%)	June 16, 2020
L.A. County Deaths	2,926	2,959	+33 (+1.12%)	
Altadena	183	186	+3 (+1.61%)	
Glendale	1,133	1,170	+37 (+3.16%)	
La Canada Flintridge	57	57	NC	
La Crescenta Montrose	37	37	NC	
Pasadena	1,048	1,058	+10 (+0.95%)	

DSN BI-WEEKLY UPDATE

6/12-15/2020 **Operating Status:** GDSCC, CDSCC, MDSCC, and DSOC/Monrovia at NASA RTOW Stage 3, JPL/DSNPO at NASA RTOW Stage 4. DSS-43 on-going DLM. All other DSN stations are reported to be operating nominally.

CDSCC:

- Limits have been set as to the number of persons able to enter each level of the DSS-43 Antenna; this is to satisfy government imposed separation distances of 1.5m with an area of 4m² per person.
- Day staff have returned to regular hours, OCC staff remain on their COVID-19 shift roster. This is being done in a manner consistent with all government constraints and some telework may need to continue. Should an outbreak occur or the numbers reverse, CDSCC will assess and take appropriate action.
- The easing of restrictions in Australian jurisdictions continues with the ACT Government cautioning to maintain physical distancing despite the changes.
- The Australian Government has released and is encouraging the use their COVID-19 App. This app will assist contact tracing in the event of an outbreak.
- All day staff and contractors at CDSCC are now working a single shift and regular hours; Operations staff remain on their COVID-19 three-shift system,
- CDSCC is proposing to switch Operations staff from their current temporary pandemic roster back to their normal FtSO roster at the end of June.

o **Key Accomplishments:** § DSS-43 TXR Upgrade Depot Level Maintenance (DLM) continues.

- Isolation barriers have been removed from around the Operations Control Center and Operations Staff are working alongside day staff.
- The site Café has re-opened for seating dining, in a limited capacity, but it is open.

GDSCC: NASA RTOW Stage 3. All GDSCC Stations remain nominal.

- Fort Irwin at Health Protection (HP) Condition C – Charlie
 - One individual self-quarantined after exhibiting flu like symptoms; completed on 6 June.
 - Currently, only United Parcel Service (UPS), Federal Express (FedEx) and the GDSCC Logistics truck are allowed through the Fort Irwin gate, which somewhat restricts shipments to GDSCC.
- o **Key Accomplishments:** § GDSCC installed S/N 108 Klystron tube into the 70-meter antenna GSSR cone to serve as load for operational checkout of high-power motor generator.
 - Approx. one third of technicians and electricians working swing shift are being notified they will return to day shift starting next week, to support critical antenna and facilities upgrades. These workers will continue to observe social distancing protocols
 - Use of face coverings and social distancing remains in effect at GDSCC (No Change).
 - GDSCC providing supplementary COVID-19 exposure information to comply with visitor access requirements from Fort Irwin. Fort Irwin expanded allowable visitor center criteria to include the entire state of California.
 - GDSCC staff assigned primarily to telework continue to submit a COVID-19 screening questionnaire prior to returning to complex (**No Change**).

MDSCC: Operating Status: NASA RTOW Stage 3.

- o **Key Accomplishments:** MDSCC has transitioned to Phase II of the MDSCC Recovery Plan, which coincides with the NASA Return-to-On-Site Work (RTOW) framework Stage 3.
- **Government extends state of alarm for final time until 21 June.**
